

# PBH-Mini Baptistry Heater

Piedmont Composites and Tooling LLC introduces a new, safe way to heat the water in your small baptistry!

## 120 Volt Circulation Heater

### Features

- The PBH-Mini will allow users to heat the water in their tank with no safety concerns. The 15' power cord is equipped with a GFCI for your protection.
- This unit is designed to make installation easy! Included with the already assembled pump and heater are suction and discharge fittings, and the on / off button. Simply mount the base in the desired location, plumb the unit to your tank and plug it in.
- The thermostat on this unit can be set at your comfort level. Once set, it will automatically cut off when it reaches that setting. After an approximate 5 degree drop in temperature the unit will come back on and resume heating the water.
- The PBH-Mini will raise 200 gallons of water at an approximate rate of 3 degrees per hour.
- May Be used with New or Existing Baptisteries

Ask about your New Baptistry arriving with the heater installed!
